

SB10, SB15, & SB25 Series

Features	Benefits
Quality Comer gearbox	Provides long life, durability construction.
Greasable bearings	Less drag and extends life of unit.
Adjustable 3-point hitch	Operator may set the distance between tractor and Snow Blower to his/her preference.
Quick Hitch compatible	Makes for faster and easier hook-up to tractor.
Large main housing	Ability to handle large drifts.
Large impeller diameter	The ability to move and throw material farther.
Guarded discharge chute	Guards against operator putting his or her hands into the impeller.
Options	
Bolt-on reversible lower wear bar	Protects against wear on the auger housing and improves service life of the Snow Blower. The optional hardened steel wear bar last longer.
Gear driven chute rotator	Allows choice of three rotator options: manual drive, electric actuator, or hydraulic motor.
Shearbolt protected impeller and auger	Eliminates costly repairs.
Three skid shoe options	Multiple surfaces allows you to pick the correct skid shoe for your application.
